Profile

WHY DOES THE TEMPERATURE FEEL HOTTER AND HOTTER

The reason why the temperature is getting hotter every year is climate change, the greenhouse effect, and the biggest contributor is HUMAN

There are several steps that can be taken to help reduce greenhouse gas emissions and global warming:

1. Reducing Greenhouse Gas Emissions
Using renewable energy sources such as solar and wind energy, as well as reducing fossil fuel consumption, can help reduce greenhouse gas emissions.

2. Energy Conservation
Adopting energy efficiency practices at home, in the workplace, and in transportation can help reduce energy consumption and related greenhouse gas emissions.

3. Recycle
Recycling helps reduce the amount of waste that ends up in landfills, which often produces greenhouse gases such as methane. Additionally, by recycling, materials that have already been produced no longer need to be processed from raw materials,
